EXPERIENCE

Software Engineering Intern

IFTTT

📅 May 2016 - ongoing 📍 San Francisco, CA

IFTTT gives you creative control over your life with Recipes, or simple connections between products and apps that are powered by a simple statement: If This Then That.

- Worked with Javascript and Ruby on Rails alongside members of the web team as they developed and launched several new products within the IFTTT ecosystem.

Organizer

The Intern Project

📅 Apr 2016 - ongoing 📍 San Francisco, CA

The Intern Project is a nonprofit whose mission is to foster a community of interns by creating and sharing events and resources that benefit the internship experience.

- Headed logistics for The Intern Picnic 2016, including but not limited to venue, food, and activities.
- Facilitated events and meetups for interns across the Bay Area to meet and learn from one another.

Software Engineering Intern

Transloc

📅 Sep 2015 - Dec 2015 📍 Durham, NC

Transloc seeks to improve the public transportation industry by making transit the first choice for all and empowering transit agencies to better serve their communities

- Worked with Javascript and Python to develop portions of the Traveler transit analysis product and built web tools for internal use within the company.

Software Engineering Intern

Embedly

📅 May 2015 - Aug 2015 📍 Boston, MA

Embedly provides tools for custom media integrations, audience insights, and campaigns to drive your content.

- Used front-end development tools including Ember.js and Python to create a fully-featured administrative backend and significant portions of the now-live next version of the company's web app.

ACHIEVEMENTS

Summer '16 Intern Slack Creator

Built and maintained a community of 1800 San Francisco Bay Area Interns as the founder of the SFBay-Interns2016 Slack Group.

6-Time Hackathon Participant

HackNC Fall '14
HackDuke Fall '14
PearlHacks Spring '15
Hacking Journalism Summer '15
VandyHacks Fall '15
HackDuke Fall '15

LANGUAGES
